PROFILE

CS Engineering student specializing in AI/ML, Cybersecurity, and Cloud technologies. Experienced in building privacy-first mobile apps, GenAI pipelines, and secure full-stack solutions using Python, Kotlin, and AWS.

EXPERIENCE

Cybersecurity & Full-Stack Web Development Intern | Cyber Sanskar Jan 2026 - May 2026

- Engineered 10 interactive cybersecurity simulators (SQLi, XSS) and cryptographic tools, integrating real-time attack visualizers and a custom SHA-256 hash engine using secure PHP.
- Developed phishing awareness modules and an email header analyzer, implementing strict MIME-type validation to educate users on threat vectors and mitigate enterprise risks.

PROJECTS

Local-Pod: Offline Generative AI Audio Pipeline Python, GenAI, Edge AI

Built a privacy-centric offline generative AI pipeline converting unstructured text into multi-speaker podcasts using dynamic chunking, JSON parsing, and zero-latency edge synthesis.

SecuNexus Mobile Threat Protection Android, Kotlin, Firebase, ML

Designed a privacy-first Android app leveraging on-device LSTM and Random Forest models for real-time threat detection, spam SMS/call filtering, and safe browsing with minimal cloud dependency.

Argus - Smart Permission Analyzer Android, Kotlin, Jetpack Compose

Developed an open-source auditing app that computes real-time risk scores using weighted heuristics to provide actionable, on-device privacy recommendations.

Twitter Sentiment Analysis Python, NLP

Built an NLP classification pipeline using live data via Tweepy to categorize tweet sentiment and visualize time-series trends for robust public opinion monitoring.

Smart Plant Watering System Arduino, IoT

Implemented an automated IoT irrigation system utilizing soil moisture sensing to trigger a water pump, with LCD monitoring and threshold-based water optimization[cite: 39].

EDUCATION

2022 - Present	B.Tech in Computer Science and Engineering (Honors: AI & ML) at Maharashtra Institute of Technology (CGPA: 9.13/10.0)
2020 - 2022	Higher Secondary Certificate at Badrinarayan Barwale Junior College (60.33%)

CERTIFICATIONS & EXTRACURRICULARS

Certifications	Amazon Web Services Cloud Practitioner, AI/ML for Geodata Analysis, TCS ION Career Edge Young Professional
Leadership	Coordinator at TECHNOPHILIA 2k25

SKILLS

- **Programming Languages:** Python (OOP, DSA, NumPy, Pandas), Kotlin, C, PHP, SQL, HTML/CSS.
- **AI & Machine Learning:** Generative AI, On-device ML, NLP, LSTM, Random Forest, Small Language Models (SLMs), Edge AI, Model Optimization.
- **Cybersecurity & Cloud:** Threat Modeling, Secure Server-side Logic, Cryptography (SHA-256), Vulnerability Mitigation (SQLi, XSS), AWS Cloud Practitioner.
- **Tools & Frameworks:** Android Studio, Jetpack Compose, MVVM, Room, Hilt, Git/GitHub, Linux.
